

Seminarreihe BILL – Biomedical Lectures Leipzig

Vorschau 2017

19.10.2017	Prof. Franck Toledo INSTITUT CURIE, Paris	The Guardian of the Genome revisited : p53 down-regulates genes required for telomere maintenance, DNA repair and centromere structure
02.11.2017	Dr. Kristin Seltmann Institute of Molecular Health Sciences ETH Zürich	Humidity-regulated CLCA2 protects the epidermis from hyperosmotic stress: Implications for Atopic Dermatitis
09.11.2017	Prof. Pascale Bomont INSERM Institute for Neurosciences, Montpellier	Gigaxonin acts as the Intermediate Filament killer: mechanisms to disease implication
23.11.2017	Prof. Dietmar Thal KU Leuven Laboratory for Neuropathology	Histological and biochemical staging of Alzheimer's disease
07.12.2017	Prof. Susanne Hartmann Freie Universität Berlin Institute for Immunology Centre for Infection Medicine	title to be announced
14.12.2017	Prof. Andreas Thum Universität Leipzig Institut für Biologie	The mini-brain of the Drosophila larvae - how learning and memory occurs
11.01.2018	N.N	
25.01.2018	Dr. Gerd Müller Universität Leipzig Molekular Onkologie	Mechanisms of cell cycle-dependent gene regulation

Ort: Sächsischer Inkubator für klinische Translation (SIKT) Philipp-Rosenthal-Str. 55, 04103 Leipzig
Raum:103
Zeit: 17 Uhr

Wir laden Sie herzlich ein;
Prof. Dr. Thomas Magin, Prof. em. Dr. Sunna Hauschildt, Prof.em. Dr. Frank Emmrich
